Description

Enquiry

ZaZaFly is a granular scatterbait against several multi-resistant fly strains, cockroaches and ants including those which have become resistant to other organophosphate based compounds, pyrethroids and methomyl. It is a fast and effective fly control tool and is a registered product to National Environment Agency.

ZaZaFly contains azamethiphos, a powerful stomach poison to flies, cockroaches and ants. It also contains pheromone that helps attract adult flies to the bait. It is easy, convenient and effective to use. There is no mixing required and no environmental risk involve.

Dosage and Administration:

Recommendation for Controlling Flies and Cockroaches Scatter

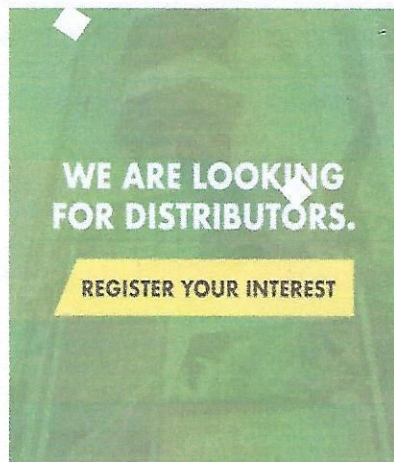

ZaZaFly at the rate of 2gm. per m2 onto clean and dry area where flies congregate.

It can be put into plates and place in strategic locations where flies are present. e.g livestock facilities, garbage bins, private homes, restaurants. Use it whenever flies are a
